Baseline Document Change Announcement

Spacer Bar for Steel U-Post

BDC03D-02

December 02, 2004

SUBJECT: Revision to Construction Detail Sheet CD-619-5 of the 2001 Standard Roadway Construction Details (Metric and English Units)-BDC03D-02

Construction Detail Sheet CD-619-5 has been revised to provide guidance for the correct use of spacer bars for the lap-spliced or nested Steel U-Post Sign Supports. The current Construction detail does not properly address all possible splicing configuration found in the field.

The revision to 2001 Standard Roadway Construction Details sheet CD-619-5 is per following:

<u>Subsection</u>	<u>Changes</u>
CD-619-5.1	Addition of notes number 4 and 5
CD-619-5.2	Revision to spacer bar details, and addition of note number 7

Implementation Code R (ROUTINE)

Changes must be implemented in all applicable Department projects scheduled for Final Design Submission at least one month after the date of the BDC announcement. This will allow designers to make necessary plan, specifications, and estimate/proposal changes without requiring the need for an addenda or postponement of advertisement or receipt of bids.
